

ODA

FTP Instructions

PC

Internet Explorer: Click on the “ODA FTP Site” link and enter your username and password provided by ODA. With Internet Explorer, you can drag and drop files and folders.

Firefox: Firefox requires a plug-in called [FireFTP](#) to upload files to an FTP server. This plug-in launches a full FTP client program for uploading files. After navigating to our server, you can find the FireFTP client under the Firefox "Tools" menu. You will need to enter the FTP address: [ftp:// ftp.oda-architecture.com](ftp://ftp.oda-architecture.com) and enter your username and password provided by ODA.

Chrome: Google Chrome does not provide drag and drop FTP access. Please use Internet Explorer, Firefox or an FTP client program.

MAC

Firefox: Firefox requires a plug-in called [FireFTP](#) to upload files to an FTP server. This plug-in launches a full FTP client program for uploading files. After navigating to our server, you can find the FireFTP client under the Firefox "Tools" menu. You will need to enter the FTP address: [ftp:// ftp.oda-architecture.com](ftp://ftp.oda-architecture.com) and enter your username and password provided by ODA.

Chrome: Google Chrome does not provide drag and drop FTP access. Please use Firefox or an FTP client program.

Safari: Safari does not provide drag and drop FTP access. Please use Firefox or an FTP client program.

FTP Client Programs: You may benefit from installing an FTP client program on your computer. This will allow you to save the settings to our FTP server (and any other servers you may need to access), and provide more control, visibility and stability to your file transfers. You will need to enter the FTP address: [ftp:// ftp.oda-architecture.com](ftp://ftp.oda-architecture.com) and enter your username and password provided by ODA.

[Filezilla](#) and [Core FTP](#) are examples of free FTP client programs.
